Cal OES INLAND REGION

Proclamation:

Modoc County:

- On 06/18/18, a proclamation was received from Modoc County, due to lack of irrigation water in the Tulelake Basin. There is no request for a Governors Declaration or State or Federal assistance at this time.
- [See Fire Activity Slides.](#)

Cal OES SOUTHERN REGION

Virulent Newcastle Disease (vND) in Chickens, Los Angeles and San Bernardino Counties

The California Department of Food and Agriculture (CDFA) has detected virulent Newcastle Disease (vND) in chickens in Los Angeles and San Bernardino Counties.

Per the Cal OES Southern Region AREP on 06/14/18 at 0846 hours:

- CDFA and the U.S. Department of Agriculture (USDA) have scaled up their response to this incident, as more cases have been detected.
- CDFA confirmed there are no commercial premises currently involved and there is no public health risk due to this virus.
- Incident Management Teams (IMTs) transitioned on 06/16/18. The IMT Red Team started on 06/17/18.

Activations

- San Bernardino Operational Area (OA) EOC is activated to Level 3 (lowest level) and will continue to monitor the incident.

Deployments

- One (1) Cal OES Southern Region Senior ESC deployed to ICP as an AREP. Operational period of 0700-1900 hours.

WEATHER OF CONCERN

Weather of Concern

- **Northern California:** Widespread triple digit heat is expected in the Sacramento Valley by Friday. The hottest day is projected to be on Saturday; slightly less hot on Sunday. Valley high temperatures are forecast to be around 100 degrees by Friday; with the hottest day of the period being Saturday; 102-105 degrees.
- **Central California:** Widespread triple digit heat is likely in the San Joaquin Valley, lower foothills and the Kern County desert Thursday through Sunday. The highest temperatures will be near 110 degrees in the valley and desert Saturday and Sunday, with overnight low temperatures in the 70s to around 80 degrees.
- **Bay Area:** Expecting a warming trend Friday, Saturday and Sunday. The hottest temperatures; triple digits, are expected for interior locations, the far northern East Bay, southern San Benito County to the far North Bay. Currently, overnight temperatures look to have good recoveries. It is too far out to determine if Excessive Heat products will be issued.
- **Southern California:**
 - **Inyo, Imperial, Riverside, San Bernardino and San Diego County:** An Excessive Heat Watch is in effect from Thursday Morning through Friday evening.
 - **Los Angeles, Ventura, Santa Barbara and San Luis Obispo Counties:** The Antelope Valley, Interior San Luis Obispo including the Salinas River Valley will experience triple digit heat; 100-105. Most other valleys and lower mountain elevations will reach the mid to upper 90s. (High temperatures ranging 10 to 15 degrees warmer than normal across inland areas. Low overnight temperatures will be around normal for this time of year which is taken into consideration for the Heat Risk Threat. Therefore, the main impacts for heat related illness will occur during the peak heating from 1000 hours to 1600 hours, each day this week.

CAL OES Regional Activities in Response to Statewide Warm-Up:

- Cal OES Regions have reached out to their respective Operational Areas (OAs) and polled for their activities related to the heat forecast:
 - **Coastal Region:** Responding Coastal OAs will remain in Duty Officer Status and monitor the heat event forecasted for this week. No cooling centers currently activated. CDO and Region ESC's will continue to Monitor Weather forecasts and provide updates from Region OA's as needed upon request.
 - **Southern Region:** Responding OAs indicate no measures outside of normal operations are currently planned or underway.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

High pressure is pushing north over California today for the start of a mostly hot, dry spell for Northern California. The exception will be a weak weather system moving across our northern areas Wednesday that will probably lead to some isolated afternoon and even overnight showers or thunderstorms in our northern mountains, primarily north of a line from Humboldt Bay across northern Trinity County to the southern Modoc County line. Temperatures will be near seasonal values for the next few days, then will begin to rise quite a bit. Expect the warmest inland valleys to generally be 100-105 Thursday through the weekend at least with some cool down currently expected early next week. Immediate coastal areas will continue to see cool marine layer effects. There is the possibility of some northerly to off shore winds developing Friday night through Saturday night that would help warm things up in the Sacramento Valley and may lead to some warming along the coast.

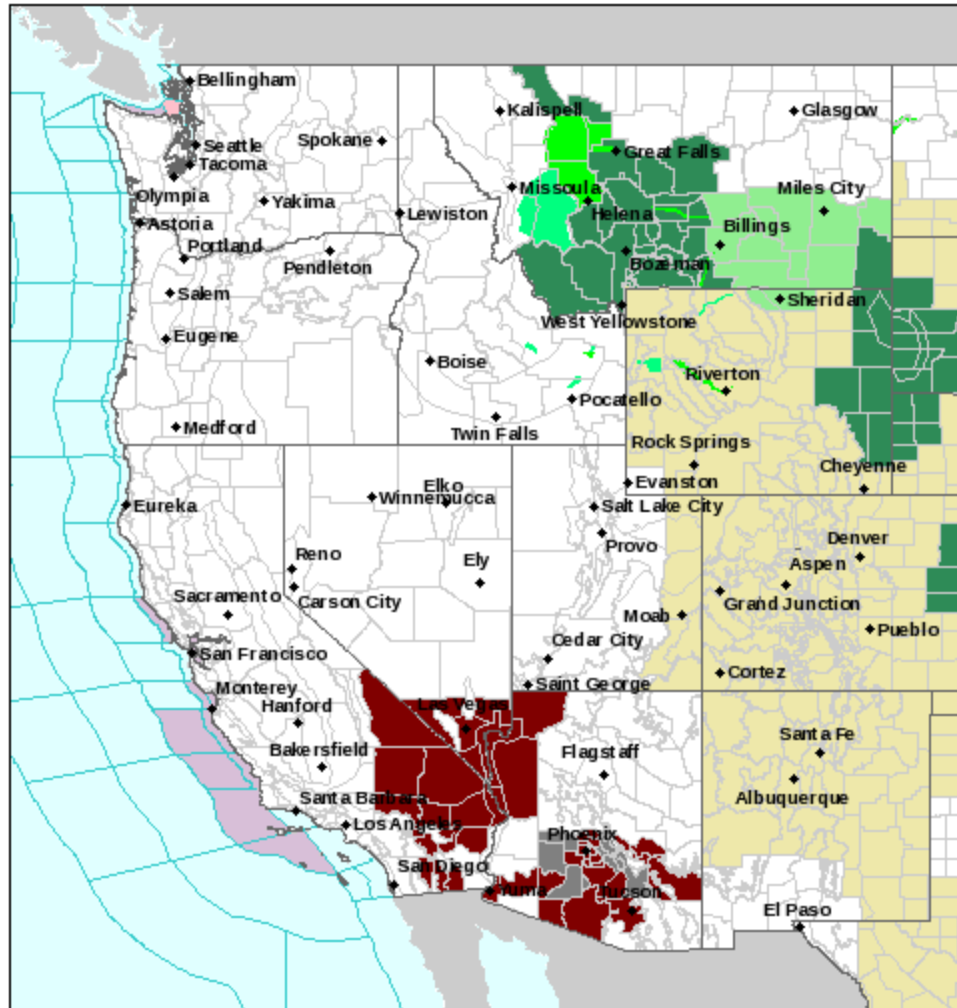

SOUTHERN CALIFORNIA

Very warm and dry this week

A prolonged period of above normal temperatures is expected this week as high pressure remains over the area. Temperatures will warm 5-10 degrees today and Wednesday under strong June sunshine. Highs will range from the 90s in the valleys and lower foothills of Southern California to 105 in the San Joaquin Valley to 115 in the low desert Wednesday through the end of the week. Minimum relative humidity (RH) will drop into the 10-15% range for 6-8 hours each afternoon away from the coast. There are some locally gusty winds in Santa Barbara County and the I-5 Corridor early this morning and some wind gusts to 30 mph will be possible today through noon. Similar wind speeds can be expected in these same areas tonight into Wednesday morning. Apart from these two areas, winds should be light this week with local sea breezes to 15 mph along the central coast and other wind prone areas. Expect little change through Friday with marine layer coverage only reaching the immediate coast by the end of the week. Slightly cooler weather will return over the weekend, but overall, temperatures will remain slightly above seasonal averages the next 7 days. No thunderstorms or strong winds are expected the next 7-10 days.

GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

- **2018-LAW-47399, 06/17/18, 0747 hours:** The International Emergency Response Coordination Center (IERCC) received a Personal Locator Beacon (PLB) SPOT activation at 38° 46' 6.2" N, 119° 43' 20.3" W. These coordinates return to the Barney Wiley Trail and Cottonwood Canyon in Alpine County. Alpine County (Search and Rescue) SAR was notified of the incident and sent in ground crews to the location. The Emergency Contact for the device said the subject was going to raft down the river. IERCC updated the location of the device three times in the first three hours and it appeared the device was moving down the river. Alpine County located the subject's vehicle near the Stateline at a popular pickup point for rafters and left a note to contact the Sheriff's Office (SO) upon his return. The (SO) off road team continued to search the river with negative results. At 1600 hours, the rafter called the Sheriff's Office to advise it was an accidental activation. **Mission Closed.**

Cal OES MISSION TASKING

Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
- **2018-FIRE-47403:** California National Guard 95th Civil Support Team (2 team member) assisting Stockton Fire Department with hazmat material identification. Mormon Slough, Stockton, San Joaquin County (Coordinating)
